

Product Overview

Qorvo's QPC2511 is a Single-Pole, Triple-Throw (SP3T) switch fabricated on Qorvo's QGaN15 0.15um GaN on SiC production process.

The throws are specifically designed for high frequency and RF power (30W) S and X band transmission linear power handling. The remaining throw is a wide-band (11+ GHz) low-pass receive path that can operate linear up to 10 W. This switch maintains low insertion loss (approximately 1.5 dB in X-band), 20 dB isolation, making it ideal for high frequency and RF power switching applications across both defense and commercial platforms.

QPC2511 is offered in a 4 x 4 mm Air Cavity Laminate package.

Lead-free and RoHS compliant.
