QPA2575

32 – 38 GHz 3 Watt Power Amplifier

Product Overview

Qorvo's QPA2575 is a Ka-band power amplifier fabricated on Qorvo's QPHT15 0.15 μm power pHEMT process. The QPA2575 operates from 32 to 38 GHz, providing 3 W of saturated power with 16 % power-added efficiency, and 19 dB small signal gain.

To simplify system integration, the QPA2575 is fully matched to 50 ohms with integrated DC blocking caps on both I/O ports. It is ideally suited to support both commercial and defense related opportunities.

The QPA2575 is 100% DC and RF tested on-wafer to ensure compliance to performance specifications.

Lead-free and RoHS compliant
